*Organized by the Faculty of Civil Engineering,  
Riga Technical University in Riga, Latvia  
from 30th of September to 2nd of October, 2015*

## FOREWORD

The conference is organized in cooperation with industrial partners and professional associates. The conference is aimed to discuss the results of both industrial and academic research on analysis and design of modern buildings and structures, innovative building materials, development of maintenance, intervention and conservation methods for

structures, construction technologies and structure management, etc. This conference is intended for scientists, engineers, managers and professionals of construction sector providing an opportunity of sharing the latest achievements, and discussing the problems. Conference participants will be given an excellent networking opportunity as well as will be able to meet their colleagues and friends.

## CONFERENCE TOPICS

High Performance Concrete  
Cements and Alternative Binders  
Composite Materials  
Alkali Activation of Minerals and Waste  
Sustainable Asphalt Technologies and Materials  
Ecological Building Materials  
Energy Effective Buildings  
Sustainability and Life Cycle of Building Materials  
Sustainable and Safe Transport Infrastructure  
Inspection, Assessment and Monitoring  
Maintenance, Repair and Strengthening  
Road Traffic Safety  
Innovative Timber, Concrete and Steel Structures  
Structural Engineering  
Geotechnics  
Geodesy and Surveying, Geomatics, Mapping and GIS  
Fluid – Structure Dam Interaction  
Heat, Gas, Water Engineering

## PARTICIPATION OPTIONS

Participant / oral presentation  
Participant / poster presentation
